EDUCATION

City University of New York – Brooklyn College

Brooklyn, NY

Bachelor of Science in Computer Science, Minor in Data Science

Expected May 2027

- Coursework: Data Structures, Algorithms, Database Systems, Advanced OOP, System Design, Data Science, Operating Systems, Intro to Software Engineering, Multimedia Database, Machine Learning

EXPERIENCE

Mira Intel

Brooklyn, NY

Software Engineer Intern

February 2026 – April 2026

- Built a customer-facing inspection analytics dashboard using React, Recharts, and Tailwind to visualize drone CV model results including defect/damage type findings, structural risk insights, and statistics.
- Developed a FastAPI and ReportLab report generator exporting structured multi-page PDF inspection reports in under 1 second, replacing manual reporting workflows.

COI Energy

New York, NY

Data Engineer Intern

October 2025 – December 2025

- Engineered a Python ETL pipeline processing 4.3M+ energy consumption records, implementing anomaly detection and data interpolation to achieve 98% data quality for predictive modeling.
- Designed a Docker-based BigQuery emulator for local ETL testing, reducing development cycle time by 40%.

Soaper LLC

Seattle, WA (Remote)

Software Engineer Intern

July 2025 – October 2025

- Rebuilt appointment scheduling system using TypeScript, React, and Tailwind CSS, improving page load performance by 45% for 500+ active users.
- Built FastAPI endpoints with phone/email verification and optimized PostgreSQL schemas, reducing query latency by 30% across patient and physician portals.

Unadat

New York, NY

Software Engineer Intern

July 2025 – August 2025

- Led a team of 8 interns as PM + SWE to revamp platform modules for 1,000+ users in an 8-week sprint.
- Built an AI document summarizer processing 800+ documents weekly, reducing manual review time by 60%.
- Implemented GCP Cloud Storage solution, improving image asset retrieval speed by 35%.

Brooklyn College CS Club

Brooklyn, NY

Software Developer

October 2024 – May 2025

- Optimized club website performance using TypeScript, Next.js, and Tailwind, improving page load speed by 35%.
- Streamlined deployment pipeline with Docker and GitHub Actions, reducing deployment time by 40%.

PROJECTS

Parallax | *TypeScript, React, Tailwind, D3.js, FastAPI, MongoDB, Docker, scikit-learn, TensorFlow, Stripe, NGINX* [github](#)

- Built an AI life simulation app generating personalized 10-year life scenarios using React, FastAPI, and MongoDB.
- Implemented a hybrid ML/AI system combining XGBoost predictions with LLM narratives, reducing response time by 60% vs. pure LLM approach while maintaining 99.9% uptime through multi-layer fallback architecture.

SayLess | *TypeScript, React, Tailwind, Clerk, Express.js, MongoDB, Gemini, ElevenLabs, Deepgram*

[github](#)

- Built an AI meeting assistant that joins meetings, records, transcribes audio, and generates summary + notes.
- Integrated Gemini API for automated summarization, producing key points and action items 5x faster than manual note-taking.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript/JavaScript, SQL, C, C++, HTML/CSS, Bash

Frameworks & Tools: React, Node.js, FastAPI, Flask, PostgreSQL, MongoDB, Git, Docker, AWS, GCP, NGINX

Data Science/ML: Pandas, NumPy, scikit-learn, TensorFlow, Matplotlib, Seaborn, Streamlit, Pydantic, XGBoost
