EDUCATION

City University of New York - Brooklyn College, Brooklyn, NY Expected Graduation: May 2027
Bachelor of Science in Computer Science | Minor in Data Science Major GPA: 3.7/4.0

- Coursework:** Data Structures, Algorithms, Database Systems, Advanced OOP, System Design, Data Science, Operating Systems, and Intro to Software Engineering.

SKILLS

Languages: Python, Java, TypeScript/JavaScript, SQL, C/C++
Frameworks & Tools: React, Node.js, FastAPI, Flask, PostgreSQL, MongoDB, Docker, AWS, GCP
Data Science: Pandas, NumPy, scikit-learn, TensorFlow, Matplotlib, Seaborn

EXPERIENCE

COI Energy - Data Engineer Intern, New York, NY October 2025 – December 2025

- Built a Python ETL pipeline processing 4.3M+ energy consumption records, implementing anomaly detection and data interpolation to achieve 98% data quality for predictive modeling.
- Designed a Docker-based BigQuery emulator for local ETL testing, reducing development cycle time by 40%.

Soaper LLC - Software Engineer Intern, Seattle, WA (Remote/Contract) July 2025 - October 2025

- Rebuilt appointment scheduling system using TypeScript, React, and Tailwind CSS, improving page load performance by 45% for 500+ active users.
- Implemented FastAPI appointment endpoints with phone/email verification and optimized PostgreSQL schemas, reducing query latency by 40% for 1,500+ patient records across patient and physician portals.

Unadat - Software Engineer Intern, New York, NY July 2025 – August 2025

- Led a team of 8 interns as PM + SWE to revamp platform modules for 1,000+ users in an 8-week sprint.
- Built an AI document summarizer processing 800+ documents weekly, reducing manual review time by 60%.
- Implemented GCP Cloud Storage solution, improving image asset retrieval speed by 35%.

Brooklyn College CS Club - Software Developer, Brooklyn, NY October 2024 – May 2025

- Optimized club website performance using TypeScript, Next.js, and Tailwind, improving page load speed by 35%.
- Streamlined deployment pipeline with Docker and GitHub Actions, reducing deployment time by 40%.

PROJECTS

Parallax | TypeScript, React, Tailwind, D3.js, Python, FastAPI, MongoDB, Docker, Nginx, Clerk, Stripe github.com/AndrewL05/Parallax

- Built an AI life simulation platform generating personalized 10-year life scenarios using React, FastAPI, and MongoDB.
- Engineered an interactive D3.js interface allowing users to adjust life decisions and view projected outcomes in real-time.

SayLess | TypeScript, React, Tailwind CSS, Clerk, Express.js, MongoDB, Gemini, ElevenLabs, Deepgram [github](https://github.com) | sayless.nyc

- Built an AI meeting assistant that joins meetings, records + transcribes audio, and speaks using cloned voices with < 1s latency.
- Integrated Gemini API for automated meeting summarization, generating key points and action items 5x faster than manual note-taking.
