EDUCATION

City University of New York – Brooklyn College

Brooklyn, NY

Bachelor of Science in Computer Science, Minor in Data Science

Expected May 2027

- Relevant Courses: Data Structures, Algorithms, Database Systems, OS, System Design, Machine Learning.

EXPERIENCE

Mira Intel

New York, NY

Software Engineer Intern

February 2026 – May 2026

- Built a customer-facing inspection dashboard visualizing drone CV model outputs including defect classifications, structural risk scores, and damage trends across 5+ infrastructure organizations including NYC Coastal Authority.
- Developed a FastAPI and ReportLab report generator exporting structured multi-page PDF inspection reports in under 1 second, replacing manual reporting workflows.

COI Energy

New York, NY

Data Engineer Intern

October 2025 – December 2025

- Engineered a Python ETL pipeline processing over 4.3 million energy records with anomaly detection and missing-data interpolation, achieving 98% data quality for downstream ML predictive and optimization models.
- Created a Docker-based BigQuery emulator environment for testing, reducing ETL development cycle time by 40%.

Soaper LLC

Seattle, WA (Remote)

Software Engineer Intern

July 2025 – October 2025

- Rebuilt the patient and physician portal scheduling system using TypeScript, React, and Tailwind with phone/email appointment verification and automated reminders, improving page load performance by 45%.
- Built FastAPI endpoints and restructured PostgreSQL schemas across all portals, reducing query latency by 30%.

Unadat

New York, NY

Software Engineer Intern

July 2025 – August 2025

- Led a team of 8 interns as PM and SWE to revamp platform modules for 1,000+ users in an 8-week sprint.
- Developed an AI document summarizer integrating a LLM API with backend processing, caching, storage, and frontend delivery, cutting manual review time by 60% across 800+ documents.

PROJECTS

Interview | *AI systems, FastAPI, Python, React, TypeScript, MongoDB, Redis, AWS S3, Docker, Clerk, ElevenLabs* [github](#)

- Built a voice-first mock interview platform supporting technical, behavioral, and resume-based sessions with a real-time AI interviewer that adapts to answers & code and pushes back on vague responses.
- Engineered a Monaco live coding environment with LLM-generated feedback tied to exact transcript moments.

Parallax | *ML systems, FastAPI, XGBoost, TensorFlow, React, D3.js, MongoDB, Stripe, Docker, NGINX* [github](#)

- Built a career simulation platform generating personalized 10-year salary trajectories and side-by-side comparisons.
- Hybrid XGBoost + LLM system reduced response time 60% vs. pure LLM with 99.9% uptime via layered fallback.

SayLess | *React, TypeScript, Tailwind, Clerk, Express.js, MongoDB, Gemini API, ElevenLabs, Deepgram* [github](#)

- Built an AI meeting agent that joins live calls, transcribes, and generates summaries 5x faster than manual notes.
- Created a real-time voice pipeline with ElevenLabs TTS, enabling the agent to actively participate in conversations.

SKILLS

Languages: Python, Java, TypeScript/JavaScript, SQL, C, C++, HTML/CSS, Bash

Frameworks: React, Next.js, Node.js, Express.js, FastAPI, Flask, Tailwind CSS, D3.js, Recharts, Streamlit

AI/ML: Scikit-Learn, TensorFlow, XGBoost, Pandas, NumPy

Databases: MongoDB, PostgreSQL, MySQL, Redis

Infrastructure & Tools: Docker, AWS (S3), GCP (Cloud Storage, BigQuery), Git, Linux
